

Covid19 Statement
March 2020

The current situation is fluid, we are being guided by government advice and implementing that guidance as we receive it.

In terms of our business continuity we have implemented strict hygiene rules internally and advised staff that the same rules should apply to them at home. Our strategy is to prevent cases entering the workplace.

Home working is advised for those members of staff where it is practically possible.

Our aim through these difficult times is to continue to operate the Company as normal, and have contingency plans in place so that we can continue to function with a minimal complement of staff.

We are restricting all overseas travel for staff and only allowing sales teams to interact with their customers remotely.

We have stocks of products and we are in constant communication with our suppliers so that we are notified in advance of any shortage of raw materials. There is no change to or reduction of our manufacturing capacity.

We are dispatching as normal.

We have not suggested that our customers stock-pile product, but if you feel that this something you should do then advise us in advance, and we will endeavor to meet your needs.
